Projects

Hospital Management System | GitHub

Jul 2026

- Engineered a full-stack hospital management web application using Java, Spring Boot, MongoDB, HTML, CSS, and JavaScript, delivering an integrated platform that streamlines core hospital operations and workflows.
- Architected RESTful APIs connecting patient registration, doctor management, appointment scheduling, prescription management, and receptionist administration into structured backend modules.
- Strengthened application performance and reliability by applying Priority Queue, Merge Sort, Binary Search, and Insertion Sort algorithms, then confirmed data-processing accuracy across modules through systematic debugging.
- Tech:** Java, Spring Boot, REST APIs, MongoDB, HTML, CSS, JavaScript, Data Structures & Algorithms

Quote Bot | GitHub

Apr 2026

- Built an interactive Quote Bot web application with dynamic REST API integration, enabling users to retrieve and browse a wide variety of quotes through a simple, engaging interface.
- Integrated real-time quote fetching into a responsive frontend, parsing API responses and dynamically updating displayed content based on user interactions.
- Refined user experience through clean layouts, responsive design, and efficient JavaScript-based event handling, resolving functional issues via structured debugging.
- Tech:** HTML, CSS, JavaScript, REST API, API Integration, Responsive Web Design

Webpage For Shop | GitHub

May 2025

- Designed and delivered a responsive business website for Samridhi Enterprises, structuring layouts to showcase company information, products, services, and contact details.
- Customized the website interface using HTML, CSS, and JavaScript with modern styling, animations, responsive navigation, and visually organized sections for an engaging user experience.
- Validated cross-device compatibility and usability through systematic testing across screen sizes, boosting responsiveness via dynamic JavaScript interactions and mobile-friendly layouts.
- Tech:** HTML, CSS, JavaScript, Responsive Design, JavaScript Interactions, Web Development

Training

Mastering Data Structures using Java – Lovely Professional University

Aug 2026

- Achieved Grade: A (Good)

Data Structures and Algorithms – Lovely Professional University

Jan 2025

- Achieved Grade: A (Good)

Certifications

- Google Cloud Fundamentals: Core Infrastructure – *Google Cloud* | Link

Jul 2026

- Database Management System – *Infosys Springboard* | Link

Jul 2025

- Generative AI: Introduction and Applications – *IBM* | Link

Jun 2026

Skills

- Languages:** JavaScript, HTML, CSS, Java, Python, C++, SQL
- Frameworks:** React, Next.js, NodeJS
- Domain Skills:** REST API Development, Backend Development API Integration, Web Development, DBMS, Responsive Design, Testing & Debugging, DSA
- Databases/Platforms:** MySQL, PostgreSQL, Windows 10/11
- Soft Skills:** Problem-Solving, Adaptability, Teamwork, Time Management, Leadership

Education

Lovely Professional University Punjab

B.Tech in Computer Science (Fullstack Specialization)

Aug 2024 – Ongoing
Phagwara, India

DAV Public School

Intermediate

Mar 2023
Muzaffarpur, India

DAV Public School

Matriculation

Mar 2021
Muzaffarpur, India
