SKILLS SUMMARY

• Languages:	C, C++, Java, Python
• Libraries & Frameworks:	NumPy, Pandas
• Tools/Platforms:	VS CODE, Git, GitHub
• Backend:	MySQL, PostgreSQL, REST APIs, MongoDB
• Soft Skills:	Team Collaboration, Problem-Solving, Adaptability

PROJECTS

Hospital Management System GITHUB	Jun 2026 - Jul 2026
- Engineered a full-stack hospital management system using Java Spring Boot, MongoDB, HTML, CSS, and JavaScript, providing an integrated platform for managing core hospital operations and workflows. - Implemented patient registration, doctor management, appointment scheduling, prescription management, and receptionist administration through structured modules connected with RESTful APIs. - Applied Priority Queue, Merge Sort, Binary Search, and Insertion Sort to efficiently organize, search, sort, and process hospital data while improving overall system performance.	

Quote Bot GITHUB	Feb 2026 - Apr 2026
- Created an interactive motivational Quote Bot with dynamic API integration, enabling users to retrieve and display a wide variety of quotes through a simple and engaging interface. - Integrated real-time quote fetching with a responsive frontend, handling API responses and dynamically updating the displayed content based on user interactions. - Optimized the overall user experience through clean layouts, interactive elements, responsive design, and efficient JavaScript-based event handling for smooth application functionality.	

Webpage For Shop GITHUB	Jan 2025 - May 2025
- Designed a responsive business website for Samridhi Enterprises, showcasing company information, products, services, contact details, and other essential business content in a structured layout. - Customized the website interface using HTML, CSS, and JavaScript with modern styling, animations, responsive navigation, and visually organized sections for an engaging user experience. - Enhanced website usability through dynamic JavaScript interactions, mobile-friendly layouts, intuitive navigation, and responsive components that maintain consistent functionality across different screen sizes.	

TRAINING

Mastering Data Structures using Java Certificate	Jun 2026 - Jul 2026
- Learned to think through problems step-by-step, built intuition, broke tasks into components, and followed a structured approach before coding. - Practiced categorizing questions, spotting repetitive patterns, mapping new problems to known techniques, and selecting effective strategies confidently. - Gained hands-on experience with major data structures and solved real interview-style problems using expert reasoning, best practices, and optimized methods.	

CERTIFICATIONS

Completed Google Cloud Fundamentals: Core Infrastructure Google Cloud Certificate	Jul 2026
Acquired Database Management System Infosys Springboard Certificate	Jul 2026
Acquired Generative AI: Introduction and Applications IBM Certificate	Jun 2026
Mastered Data Structure and Algorithm Lovely Professional University Certificate	Jan 2025

EDUCATION

• Lovely Professional University Bachelor of Technology - Computer Science and Engineering CGPA: 7.33	Punjab, India Since Aug 2024
• DAV Public School Intermediate	Muzaffarpur, Bihar Jun 2021 – Mar 2023
